

42+ Images To Help You Better Understand Different Types Of Retaining Walls In Construction

1.5K views

81 Shares

A retaining wall is a structure that is designed and constructed to withstand the lateral pressure of soil or hold back soil materials. The lateral pressure could also be due to earth filling, liquid pressure, sand, and other granular materials behind the retaining wall structure. There are various types of retaining wall structures that are used for numerous purposes.

Types of Retaining Walls

- Gravity-Retaining Wall
- Crib-Retaining Wall
- Gabion Retaining Walls
- Cantilever Retaining Wall
